

Author's Contribution Form

Use this form to specify the contribution of each author of your manuscript. For each author of your manuscript, please indicate the types of contributions the author has made. An author may have made more than one type of contribution. Optionally, for each contribution type, you may specify the contribution of an author in more details by providing a one-sentence statement in which the contribution is summarized. In the case of one author who contributed to performing the analysis, the author's contribution for instance could be specified in more details as "performed the computer simulations", "performed the statistical analysis", or "performed the text mining analysis". If an author has made a contribution that is not covered by the pre-defined contribution types, then please choose "other contribution" and provide a one-sentence statement summarizing the author's contribution.

Manuscript title

.....

For a manuscript of more than one author, use the following (please Tick \checkmark in the appropriate box for the author):

S.N	Author's Name*	Conceived & design of the study	Collected the data	Contributed data or analysis tools	Performed the analysis/ interpretation of data	Drafting the manuscript/ revising for important intellectual context	Approval of the final version of the manuscript**
1							
2							
3							
4							
5							
6							
7							
8							

*list the authors' initials followed by surname (e.g. Y.L. Cheung), ** This is required for all authors

Author's Contribution Form

Other contribution:

Author's number	Specify contribution in more detail (no more than one sentence)
1	
2	
3	
4	
5	
6	
7	
8	

For a single author, use the following only:

- The author confirms sole responsibility for study conception and design, data collection, analysis and interpretation of results, manuscript preparation, and approves the final version of the manuscript.

Author's Contribution Form

N.B.

The authors list should contain only those who can legitimately claim authorship. This is all those who:

- ✓ have made a substantial contribution to the concept of design of the study, analysis, or interpretation of data;
- ✓ drafted the manuscript or revised it;
- ✓ approved the version to be published; and
- ✓ agreed to be accountable for all aspects of the work in ensuring that questions related to the accuracy or integrity of any part of the work are appropriately investigated and resolved.

Authors should meet the conditions of all the points above. All contributions who do not meet the criteria for authorship should be instead listed in an "Acknowledgments" section.

This should be signed by all the authors
